Magdalena Czeredys, PhD
Department of Stem Cell Bioengineering
Mossakowski Medical Research Institute, Polish Academy of Sciences

To whom it may concern:

Dear Magdalena,

This letter is to confirm that I will be very happy to collaborate on your project entitled “Role of Store-Operated Calcium Entry dysfunction in striatal neurodevelopmental pathology of Huntington’s Disease”.

In case the funding application is successful, I will train you and your lab members in technical expertise related to Multi-electrode Array and patch-clamp techniques for functional studies of Huntington’s disease neurodevelopment using hiPSC-derived models.

Sincerely,

Attila Szűcs
Senior Researcher
