To whom it may concern:

Dear Magdalena,

This letter is to confirm that I will be very happy to collaborate on your project entitled "Role of Store-Operated Calcium Entry dysfunction in striatal neurodevelopmental pathology of Huntington's Disease".

If the funding application is successful, I will provide you with isogenic juvenile-onset HD, control, and HTT KO hiPSC lines to generate NPCs, MSNs, and striatal organoids.

I will also support you and your lab members with technical expertise in CRISPR editing to generate an isogenic adult-onset hiPSC line for studying the role of dysregulated SOCE in striatal neurodevelopmental pathology in HD.

You are welcome to visit my laboratory to discuss these experiments.

Sincerely,
